The "COMMUNITY BUILDER"
is the man who puts into the hands
of his customer that which does
him the "greatest good." That
which enables him to do the great-
est amount of labor in the least
possible time.
That which causes him the least
amount of loss in the use of the
thing that you have put into his
hands for the purposes intended.
Give him the thing that "puts him
to the good" and HELPS HIM to
accomplish his ends.
